

YUULIN AN

Applied Economist | Quantitative Researcher | Data Analyst

✉ Yuulin.An@colostate.edu 📞 253-230-0495 📍 Fort Collins, CO
🌐 www.yuulinan.com 🔗 LinkedIn 🎓 Google Scholar

Applied microeconomist and Ph.D. candidate specializing in causal inference and data-driven policy research. Skilled in using R, Stata, and Python to analyze large and complex datasets, identify causal relationships, and translate empirical findings into meaningful policy insights. Research focuses on health, environmental, and regional economic issues.

RESEARCH EXPERIENCE

Applied Economics Researcher

Colorado State University

📅 2022 – Present

Conduct independent and collaborative applied economic research using administrative data, causal inference, and statistical programming to evaluate policy-relevant questions.

- Evaluated the health effects of airborne lead exposure by linking Texas birth records with race events, emissions, meteorological conditions, and geographic data; developed a quasi-experimental design exploiting distance, wind direction, exposure timing, and emissions.
- Developed a pregnancy-specific exposure model to translate intermittent environmental exposures into maternal and fetal lead burdens and quantify relationships with birth outcomes.
- Studied health-care provider decision-making by linking more than one million Texas birth records with NCAA and NFL game schedules to examine delivery timing and maternal complications.
- Analyzed population aging and regional economic growth using county-level longitudinal data and instrumental-variable methods to estimate how demographic change affects local economies.
- Clean, merge, validate, visualize, and analyze large datasets from multiple administrative and public sources using R, Stata, and Python.

Research Assistant

Regional Economic Development Institute, CSU

📅 Summer 2025

- Conducted applied economic research on population aging, regional connectivity, and economic growth across U.S. communities.
- Translated empirical findings into a policy-facing report on how regional integration can help rural communities adapt to demographic change.

Research Assistant

Future of Work, Russell Sage Foundation

📅 Summer 2024

- Supported quantitative economic research through data preparation, analysis, and empirical research.

ADDITIONAL EXPERIENCE

Graduate Teaching Instructor

Colorado State University

📅 2025 – Present

- Instructor of record for six sections of *Working with Data*, teaching students to clean, analyze, visualize, and interpret real-world datasets.
- Translate technical statistical and data-analysis concepts into accessible explanations for students with varying quantitative preparation.

SKILLS

Causal Inference Econometrics
Statistical Analysis Data Visualization
Difference-in-Differences
Event Studies Regression Discontinuity
Instrumental Variables Program Evaluation

Programming & Data

EDUCATION

Ph.D. in Economics

Colorado State University

📅 Expected Spring 2027

M.A. in Economics

Colorado State University

📅 May 2024

B.A. Economics & Business Administration

Coe College, Cum Laude

📅 May 2022

SELECTED ACHIEVEMENTS

📄 Peer-Reviewed Publication (2025)

Journal of the Economics of Ageing

🏆 Dissertation Fellowship (2026)

Departmental fellowship supporting dissertation research

🏆 WEAI Graduate Student Workshop (2026)

Selected for competitive job-market training

🏆 NBER Mentoring Program (2024)

Aging and Health Economics Research
